

Lussandre Lederrey

Versatile junior developer

Experience & Education

Nexelec - Saint-Avé (France)

16-week internship • 2025

- Update and cleanup of a TypeScript monorepo (Next.js, Fastify, Prisma, ...) and improvement of build times
- Overhaul of code quality : introduction of OXlint, fixed hundreds of warnings and removal of almost all any's
- Improvement of DX & CI : local Actions with act, labels to target jobs, hash tool and Git hooks
- Performance & UX improvement : memoization, dynamic import, CSS purge and fixes of UI inconsistencies
- Design of a complete module for monitoring SIM card usage (PubSub cron, InfluxDB, PostgreSQL, API, charts and filterable tables)
- Improvement of internal documentation

Koumoul - Vannes (France)

10-week internship • 2024

- Redesign of the visualization application and migration to Vue.js 3
- Addition of advanced data visualization features: filters, sorting and dynamic calculations
- Creation and integration of new color palettes in the shared library
- Development of a new pie chart visualization in pure SVG in a few days, optimized and independent from any library
- Modernization of the back-office as a pair: separation of Docker images, dependency migration and UI improvements

IUT Vannes

Bachelor's degree in Computer Science • 2022 - 2025

Lycée Saint-Paul Vannes

French Baccalaureate • 2018 - 2022

Personal projects (open source)

unzip-bot

A Telegram bot in Python to extract archives, 40k+ users, 160+ forks, maintained for 4 years

[GitHub link](#)

Senescalade

A web app for registering to a climbing club in Nuxt + MySQL, with an API, Docker and a complete admin back office

[GitHub link](#)

monorepo-hash

A fast CLI tool to compute the hash of monorepo workspaces, powered by Bun and compatible with all package managers

[GitHub link](#)

better-maps

An improved Google Maps to create and filter your own points on a map, with collaborative maps, multi user and mobile support
